At seven years old, we decided to take Hannah out for the first time in three years. Yeah, she's still got her mojo, with 2xBOB at REDGA, followed by BOB at NWODGA, then 3<sup>rd</sup> at Nationals! Now 9 years old, she is as correct and stylish as ever. Full or empty, at home or the showing, Hannah is one of the most beautiful does I have owned. She simply floats as she walks, and is so correct that she is always beautifully set up. Although her udder isn't as capacious as some of our other does, it is very tightly attached, with extremely correct teats and medial. Sure, we'd like more milk, but her daughters have been milking well, with her high components, wonderful flavor and ease of milking. Hannah now has at least two FS91 daughters.

Yes, a hot yearling can grow up into a beautiful, productive doe. Obviously, Evianna's a pretty special doe, but what I like the most is how complete she is. She is strong in general appearance, and has an extremely correct udder with a beautiful rear udder. She is a big girl, but has lots of femininity and dairyness. Most important to me is that for all her early awards, she was never overmature, always looking like a young doe with room to grow. As a 4 year old, she freshened with a big healthy set of triplets, had a high test over 16 lbs, and was finally fully mature, with all the depth, angularity and dairyness we were waiting for. Now 7 years old, she is still just as correct and beautiful as she was as a yearling. She has been a solid doe in the milk parlor too, with a 10 lb a day lifetime average, and a Top Ten record to go with her National Champion! After a year off last year, Evianna is back in form with 2xBOB, BUOB, BIS and BUIS, including the District 7 LaMancha Specialty this year.

Torah is a Hannah daughter, and has her dam's level topline and general presence. She is wider, deeper, longer and more level, and attracts the most attention from farm visitors of any of our LaManchas. Like Hannah she has an extremely correct udder, only with more milk than her dam. Torah freshens off season, good for us, but not so good for her show record or appraisal scores. We don't usually do farm photos, but since Torah freshens in Nov, very few people get to see her fresh. We think she's pretty special. Torah freshened 11/24/14 with quads. We kept one dark chocolate buck for ourselves, but when we realized we couldn't use as much as we thought, we decided to buy his sire instead. Torah's son Sage is now available.

Okay, even though she was stale, we decided to see what she could do in a showing this year. Well, apparently she can do just fine, with 2 GCHs and 1 BIS in her first two rings! She just missed finishing her GCH with a reserve in the third ring. Guess we'll have to take her out some more!

s-+\*B Kastedemur's On Second Thought  
d-SGCH Tempo Hannah 5\*M

Karine is my personal favorite young LaMancha. She is a strong yet dairy doe, easily milking over 10 lbs as a yearling, from a pretty udder. Like her dam, she is smoothly put together, with a very correct front end assembly and clean, straight legs with strong feet. Pictured as a newly fresh yearling, after a year of milking through she finally gained some condition and has flattened her rump into a nearly tabletop levelness and is a striking doe in general appearance. She is more dairy than Hannah, and milking more for her age. Shown twice as a yearling, she was 1<sup>st</sup>/1<sup>st</sup> udder in both rings. After a year of milking through, we were excitedly awaiting her Nov freshening, until she had a huge single buck!

'14 1xGCH, 2xRSGCH, '15 1xRSGCH

Like Karine, Karenina is a very tall and long young doe. She is very dairy, with a correct and capacious udder. She's not fond of being shown (or having her picture taken), but is an elegant doe at home, simply beautiful as she moves about in the pasture. She milks more than her records indicate, she absolutely hates the meters and won't let milk her down on test day. She's a big girl, now bigger than her dam, with tremendous length and a long level topline. We are a little grumpy that she has never had a doe kid!

## TEMPO JOSEPHINE

born 11/13 solid dark chocolate

Josephine is tall junior yearling doe out of one of our favorite young LaManchas. Her dam Twyla was sired by a Janica son, out of a Hannah daughter. Twyla combined high production with structural correctness. She was very strong in general appearance, and had a lovely well attached udder. She was stale on appraisal day, but averaged 7.5 lbs/day on an extended lactation as a yearling. Though we were very sad when we were unable to keep Twyla herself, we are excited to see how her Chalupa daughter freshens. After slipping her early pregnancy, Josie freshened in late April with a beautiful udder.

Pictured is Twyla 2 yrs old and 8 months fresh

## TEMPO JULIA MARIE

born 3/14 cinnamon chamoisee

Julia is a fancy doe kid from our tallest and most elegant LaMancha doe. Janica's general appearance, dairy character and style were remarkable. She was also a high production doe, milking a Top Ten record from a well attached udder with a high wide rear udder. Knowing it was time to retire Janica this year, we were very pleased when she gave us a doe kid that is a carbon copy of her dam. Julia has shown well as a kid, placing 2x2nd and 1xRSJCH in large classes at our most competitive state fairs. Julia was 1xGCH at a large show this year as a dry yearling.

## **LAMANCHA BUCKS-**

### **\*B TEMPO SAGE**

born 11/14, purebred, dark chocolate

s-\*B Lone Thistle Presto

d-SG Tempo Torah Bright 6\*M

I initially Sage as his dam is one of our favorites, and I really liked the cross with Presto. Sage is a beautiful dark chocolate, very correct young buck. Unfortunately, I realized I just can't use him as much as I hoped, as much of our small LaMancha herd is closely related to Hannah and Torah. So, I am planning to purchase Sage's sire, and am reluctantly offering him for sale. He is a growthy November kid, and ready to go to work anytime. \$550

### **\*B LONE THISTLE PRESTO**

I wanted to bring back some of my older LaMancha genetics, especially the Audrey/Elinor/Sidney line. Adding in a little Tach, Travis and Bewitched made the pedigree all that much better. Travis and Tach were my LaMancha foundation sires. Bewitched and Abracadabra were some of my favorite LaManchas for their frame, strength and dairyness. There simply are no animals in this pedigree that I didn't admire. Presto is a long tall fellow with good bone and correct feet and legs. He has some very nicely uddered young daughters that are quite promising. Many thanks to Jessica McDonald, owner of Presto, for letting me use him, and to Barnowl and Lone Thistle for working together as colleagues to put together such a nice pedigree.
