Now retired, Hannah is as correct and stylish as ever. Full or empty, at home or the showing, Hannah is one of the most beautiful does I have owned. She simply floats as she walks, and is so correct that she is always beautifully set up. Although her udder isn't as capacious as some of our other does, it is very tightly attached, with extremely correct teats and medial. Hannah has high components, wonderful flavor and ease of milking. Hannah now has at least two FS91 daughters. At seven years old, we decided to take Hannah out for the first time in three years. Yeah, she's still had her mojo, with 2xBOB at REDGA, followed by BOB at NWODGA, then 3rd at Nationals! At 11 years old Hannah gave us triplet does, so we felt it was time for her to retire.

Yes, a hot yearling can grow up into a beautiful, productive doe. Obviously, Evianna's a pretty special doe, but what I like the most is how complete she is. She is strong in general appearance, and has an extremely correct udder with a beautiful rear udder. She is a big girl, but has lots of femininity and dairyness. Most important to me is that for all her early awards, she was never overmature, always looking like a young doe with room to grow. As a 4 year old, she freshened with a big healthy set of triplets, had a high test over 16 lbs, and was finally fully mature, with all the depth, angularity and dairyness we were waiting for. Now 9 years old, she is still just as correct and beautiful as she was as a yearling. She has been a solid doe in the milk parlor too, with a 10 lb a day lifetime average, and a Top Ten record to go with her National Champion! We feel Evianna has nothing left to prove, and have retired her.

Rosemary is a carbon copy of her dam, very tall and dairy. Initially a gangly teenager, she has started to fill out and gain some depth to balance her dairyness. Rosemary freshened with a capacious, well attached udder. She looks great and is milking really well. Though we don't show many of the LaManchas, we took her out a few times, where she placed 1st or 2nd, with a couple reserves, as well as a BUOB.

Meryl is a sharp, correct doe with a lot of dairy strength and strong feet and legs. Fresh as a yearling, Meryl was quite awkward and still growing into an extremely tall young doe and milking well, so we milked her through this year. Like our other Presto daughters, Meryl has a correct udder and has milked a steady 8-10 lbs as a yearling.

'18 3xBOB

Beezie is an experimental that managed to capture the best of both sides. Tall, angular and dairy from Handyman, with a correct udder and beautiful general appearance from Josie. Like the Handyman daughters, she will be slow to fill out her frame, but is one of our more exciting young does. We took her out to our most competitive club show, where she was 3xGCH, 1xBOB, 1xBUOB and 1xBIS as a first freshener last year, she returned this year to win 3xBOB.

'18 3xGCH, 3xRSGCH, 1xBUIS, 8x1st, 1x2nd,

My favorite of the yearlings last year. Silhe was a hard working yearling milking between 10-12 lbs, so we opted to milk her through this year. She is a very sound young doe in both structure and mammary, with an eye catching style and balance. Despite being a first freshener on extended lactation, Silhe has done quite well at our competitive NW shows this year, finishing her GCH with a BUIS win!

< 2 yr old, 14 mos fresh

TEMPO KIIRA 7*M

born 1/16 ID608 pale chamoisee

1-02 305 2657 94 3.5% 83 3.1% ext 451 3925 140 125

Like her dam, it has taken Kiira awhile to grow into herself. But, she has maintained a steady 9-10 lb average while growing. She is sound on her feet and legs, and correct throughout with a nice balance of strength and dairyness. Her change in appraisal scores is an accurate indicator of how much this young doe has developed in on year. She is milking through this year and hasn't been shown.

'18 2x2nd, 1xRSGCH

Sochi is a wide and strong young doe with a wide, level rump. She freshened with an udder much like Evianna and is milking very well. Her appraisal score is as high as allowed, showing the promise of this neat young doe. Shown twice, she was 2x2nd, 1xRSGCH in an extremely competitive show.

'Nita freshened with a very nice udder and has correct general appearance. Though immature yet, it looks like she'll be staying right here! Like her dam, 'Nita attracts more attention than our other young does with her level topline and graceful carriage. Shown twice, Nita was 2x3rd in a huge class of beautiful 2 yr olds, despite being stale. It is going to be hard to wait to see her fresh again!

I loved Venice the first time I saw her as a 2 yr old. By the end of that summer, I had a buck ordered. Vito finally came after two years of waiting (during which Venice became a National Champion!). He was one of quads, but lively and tall. Long and dairy like his dam, we are very excited about this boy! Thank-you Trinity!!!

When I first saw the Spotlight Sale catalog, I was intrigued by the production and type scores behind this buck. Then when I saw his length of body, tremendous bone and dairy strength, and super correct feet and legs, I decided he could come work on our dairy. I think his power will be a nice compliment to Vito's dairyness, and am excited to see the two work together. Thank-you Sharon Hittner, and good luck with Karolyta.
