

LAMANCHA DOES-

2020 was the year of hard choices for us. Due to COVID, we needed to sell 1/3 of our mature does. The cuts were deep and tough to make. Since LaManchas aren't our major breed, those cuts were particularly extensive. Only four milkers stayed with us. Then, we gave two of those to thank our our friends who bravely drove nearly 800 miles round trip to help us evacuate from the fire. But we still had my favorite, Elite doe SGCH Tempo Silhe 7*M, the heart and soul of our LaMancha herd. That December, Silhe died from a sudden toxicity. Since she was the reason we even have LaManchas, the loss was devastating. That left us with one yearling milker and four kids to freshen, and me wondering why I was staying in LaManchas. Since then, I've sold all the bucks, though we do still have a nice semen inventory and have semen for sale. Again this year, I sold even more and I am still deciding what to do with them, but for now I am keeping these last few.

Life gets you all excited with twin does like these, then throws you a curve when you have to sell several milkers in a hurry before cancer surgery. Unfortunately, with these doe kids, Frog ended up on that list.

Shoofly freshend in late April with a single doe that retained. She scored 1-3 FS86 VVVV this year. She is a stylish and dairy young doe that is maturing nicely.

After a pseudopregnacy, Sky is confirmed due to freshen in November. She is the powerhouse of the two with a lot of bone and strength. She is bred Saanen and her kids could make someone some very special Experimentals!

TEMPO IREEN

Born 11/22, black and tan

Ireen's dam, Jutta, was a herd favorite. Finally a LaMancha to show who loved being in the ring! With two National Champions for granddams, I shouldn't have been surprised when Jutta wanted to be a show goat. But again, we had to make some deep herd cuts, and with pretty Ireen to keep, we sold Jutta. Ireen has her dam's correctnees and is even more dairy and elegant. Shown twice as a senior kid, she was 1x1st & RSGCH, 1x2nd. She is bred AI to South Fork Sir Lancelot, fingers crossed she settles! Note, semen is available on Jutta's sire Vito
