

BREEDINGS, PRICES, TERMS AND HEALTH CONDITIONS-

We follow CAE prevention with annual testing and pasteurization, and are abscess free. We do our best to disclose any known health issues prior to an animal being sold. We value our reputation more than any of our awards, and try to be as honest as possible. We do not knowingly sell animals with health or reproductive problems (with the exception of brood does where the problem is discussed first). The prices listed include ADGA registration, DNA typing and microchipping, but do not include shipping, kennel or delivery to the airport. I will provide an interstate health certificate as needed at \$50, additional testing as required by some states (TB and/or brucellosis) now costs \$30 per kid. Prices are negotiable, and may change depending on the quality of the dam when she freshens, but preordered kids with a deposit will not increase within a given year. A \$100 deposit will hold any kid, and is refundable or transferrable only if that kid is not born or is not of acceptable quality. Preordered kids must be paid in full within 14 days of birth, or they will be offered to the next person in line. We do reserve breeder's right to first choice of all kids, though in reality I have only cancelled a sale twice in over 40 years. ***We now offer \$200 off on kids picked up at the farm before three weeks old.*** All kids must be picked up/shipped by 4 weeks of age unless other arrangements are agreed on in advance. We do charge \$10 per day boarding fee for kids held after 4 weeks of age. This includes being raised on pasteurized milk and vaccines/parasite control as per our treatment schedule. Adult animals must be picked up at the farm unless delivery arrangements are made prior to purchase. All kids and adult animals which are being held for delivery must be paid for in full when they are reserved, deposits are only for unborn kids. Some payment plans or arrangements can be made in advance.

Deposits and payments may be sent to **Lauren Acton DVM at 9915 S Wildcat Rd, Molalla, OR 97038.**

NOTE-Please send letters via regular mail only, as our mail person will not deliver anything else. Special Delivery letters, including Overnight or Express, will be delayed at least one week. All kennels and semen shippers must be sent by Fed Ex or UPS. Please DO NOT send anything requiring a signature, there is a good chance it will be returned as I am frequently not here when they are delivered.

Off Season Deposits- I accept reservations all year. However, I do not know breedings or prices for spring kids until things are finalized in late Sept. What I do is to accept the deposit at any time. This puts you in the line. If you do not like the new breedings or prices, you have until Oct 1st to withdraw or move your deposit. At that point, it becomes a regular deposit, and is refundable only if an acceptable kid is not born.

Baby pictures- NO. I think an honest evaluation of a kid is more accurate than an unnaturally posed picture of a fuzzy baby. Frankly, I haven't been breeding goats long enough to predict how one kid will end up as an adult from another kid, except based on performance data of adult relatives. So, I provide as much of that as I can and don't do baby pictures or buck pictures.

Shipping- We do ship by air as possible. Sadly, like most things the costs just keep going up. You must prepay a \$500 airfare charge for one kid, or \$650 for two in one crate. We can provide you with a new kennel for \$150-200 depending on size, or you can send us an IATA approved kennel (metal door and fastener, two water dishes.

See above for addresses for checks and kennels.

2023-2024 shipping- We were able to ship kids by air last year. There are also excellent ground transportation options available now. Due to weather restrictions, we do not air ship after the first week of May.

NOTE- We will ship kids to any state, but shipping to Puerto Rico is an extreme hassle and we will no longer do it. All export and Puerto Rico kids must go to another facility (arranged by the buyer) for processing.

Feeding program- Our kids are raised on pasteurized milk and alfalfa hay. Grain and pasture are not introduced until weaning, usually about 10 weeks old. We do experience problems with too rapid growth, especially in the Saanens, so we do not free feed. All sale kids are raised with our own 'keeper' kids on the same feeding and health program. We recommend putting your kids on your parasite control program upon arrival. In our experience, early freshening is detrimental to does bred for ultra high production, so we wait a few extra months to breed yearlings. ***We will not be responsible for any doe which freshens prior to 16 months old.*** Just because they can grow fast and freshen young does not mean they should!!!

2023-2024 BREEDING & PRICE LIST

**** We now offer \$200 discount on kids picked up at the farm by 3 weeks old.**

NOTE- prices and breedings are subject to change, preordered kids with a deposit will not increase for this breeding season
 * = first kid reserved (we will accept two reservations), NFS = not for sale, PT= private treaty, ??? = we'll see how she freshens!
Discounts do not apply to crossbred kids. The listed price is here at farm, if shipped by air, they will be >\$500 each.
 Most of our off season does are exposed to two or more bucks. We will provide DNA typing of the kids, but since it may not come back before the kid needs to be shipped, you as a buyer must be willing to accept either sire.

Mature does and bucks for sale-

We periodically have extra milkers for sale, everything from brood does to show does. Sorry, we do not take deposits for milkers, nor do we maintain a list of interested buyers. When they do come up for sale, it is on a first come, first served basis. Once we decide to sell a doe, it is our intention to move her as quickly as possible. Most are available in the late spring and early summer, with a few sometimes available from our fall freshening does. The best thing is to watch the website or my facebook, or periodically email or text me about availability. As we incorporate a commercial dairy into our management, we are putting more emphasis on milk quality. Thus, some genetically valuable animals occasionally come up for sale with varying degrees of udder health issues. Another issue may be reproductive health. Frankly, I truly dislike working in reproduction, so I would often rather move these does than work with them. In this case, payment is only due when you get a healthy kid. Please contact me if you are interested in working with these types of does.

We also retire a few does each year. While we would like to keep all our older does their entire lives, realistically we are able to maintain only a few of the most special ones. We like to rehome the others when they are still young enough to tolerate a move to a permanent home in a smaller herd. These are does that are approximately 7 years old. Most are healthy enough to produce more kids, but getting older so they have a harder time competing in our larger herd. Or they simply deserve more personal attention than we are able to give them. These are some of our best does, or they wouldn't have been able to live here that long.

Currently we have no adults for sale, check back in May.

SEMEN-

We have semen available from most of our sires, both foundation animals and our more contemporary bucks. Our semen list can be viewed under '**Download Semen Sales List**'. I usually can deliver semen to the ADGA Convention and Nationals, as well as regional shows and events, or it can be picked up here. We will ship semen if you provide the shipper. We do have a \$100.00 minimum on semen purchases, although that can be combined with other buyers transferring semen at the same time. Please refer to the section on Semen for information on prices and availability.
