

BREEDINGS, PRICES, TERMS AND HEALTH CONDITIONS-

We do not knowingly sell animals with health or reproductive problems (with the exception of brood does where the problem is discussed first). We follow CAE prevention with annual testing and pasteurization, and are abscess free. The prices listed include ADGA registration and delivery to the airport, but do not include shipping or kennel. I will provide an interstate health certificate as needed at no cost, however additional testing required by some states (TB and/or brucellosis) now costs \$20 per kid. Prices are negotiable, and may change depending on the quality of the dam when she freshens, but preordered kids with a deposit will not increase within a given year. A \$100 deposit will hold any kid, and is refundable or transferrable only if that kid is not born or is not of acceptable quality. We do reserve breeder's right to first choice of all kids, though in reality I have only cancelled a sale twice in over 40 years. ***We now offer \$100 off on kids picked up at the farm before three weeks old.*** All kids must be picked up/delivered by 4 weeks of age unless other arrangements are agreed on in advance. We do charge \$50 per week boarding fee for goats held after 4 weeks. This includes being raised on pasteurized milk and vaccines/parasite control as per our treatment schedule. Please note that depending on our milk supply, kids over 5 weeks old may have to go on milk replacer. Adult animals must be picked up at the farm unless delivery arrangements are made prior to purchase. Preordered kids must be paid in full within 14 days of birth, or they will be offered to the next person in line. All kids and adult animals which are being held for delivery must be paid for when they are reserved, deposits are only for unborn kids. Some payment plans or arrangements can be made in advance.

Deposits and payments may be sent to **Lauren Acton at 9915 S Wildcat Rd, Molalla, OR 97038.**

NOTE-Please send letters via regular mail only, as our mail person will not deliver anything else. Special Delivery letters, including Overnight or Express, will be delayed at least one week. All kennels and semen shippers must be sent by Fed Ex or UPS. Please DO NOT send anything requiring a signature, there is a good chance it will be returned as I am frequently not here when they are delivered.

Off Season Deposits- I accept reservations all year. However, I do not know breedings or prices for spring kids until things are finalized in late Sept. What I do is to accept the deposit at any time. This puts you in the line. If you do not like the new breedings or prices, you have until Oct 1st to withdraw or move your deposit. At that point, it becomes a regular deposit, and is refundable only if an acceptable kid is not born.

Baby pictures- I think an honest evaluation of a kid is more accurate than an unnaturally posed picture of a fuzzy baby. Frankly, I haven't been breeding goats long enough to predict how one kid will end up as an adult from another kid, except based on performance data of adult relatives. So, I provide as much of that as I can and don't do baby pictures or buck pictures.

Shipping- We do ship by air as needed. We ask that you prepay a \$350 airfare estimate for one kid, or \$500 for two in one crate. We will correct the charges when we have the final bill. We can provide you with a new kennel for \$95-125 depending on size, or you can send us one. Kennels must be IATA approved with metal doors and bolts, and have two water dishes. See above for addresses for checks and kennels.

Feeding program- Our kids are raised on pasteurized milk and alfalfa hay. Grain and pasture are not introduced until weaning, usually about 10 weeks old. Coccidia is treated by regular, monthly treatments of Albon, and kids are vaccinated with CDT at monthly intervals until 4 months of age. We do experience problems with too rapid growth, especially in the Saanens, so we do not free feed. In our experience, early freshening is detrimental to does bred for ultra high production, so we wait a few extra months to breed yearlings. We will not be responsible for any doe which freshens prior to 16 months old. Just because they can grow fast and freshen young does not mean they should!!! Kids are treated for coccidia before they leave, and we recommend treating again after they arrive. We do our best to disclose any known health issues prior to an animal being sold. We value our reputation more than any of our awards, and try to be as honest as possible.

2017-2018 BREEDING & PRICE LIST-

**** We now offer \$100 discount on kids picked up at the farm by 3 weeks old.**

NOTE- prices and breedings are subject to change, preordered kids with a deposit will not increase for this breeding season

* = first kid reserved (we will accept two reservations), NFS = not for sale, PT= private treaty, ??? = we'll see how she freshens!

Discounts do not apply to crossbred kids. The listed price is here at farm, if shipped by air, they will be \$500 each.

Most of our off season does are exposed to two or more bucks. A buck listed with a * indicates an observed breeding, no * means they were pen bred. We will provide DNA typing of the kids, but since it may not come back before the kid needs to be shipped, you as a buyer must be willing to accept either sire.

Mature does and bucks for sale-

Bucks-(undecided yet)

We may be offering some mature bucks for sale this fall, with transport available to convention. Please contact me (lauren@ruhigestelle.com) if interested.

Mature does-(sold)

We periodically have extra milkers for sale, everything from brood does to show does. Sorry, we do not take deposits for milkers, nor do we maintain a list of interested buyers. When they do come up for sale, it is on a first come, first served basis. Once we decide to sell a doe, it is our intention to move her as quickly as possible. Most are available in the late spring and early summer, with a few sometimes available from our fall freshening does. The best thing is to watch the website, or periodically email me about availability. As we incorporate a commercial dairy into our management, we are putting more emphasis on milk quality. Thus, some genetically valuable animals occasionally come up for sale with varying degrees of udder health issues. Please contact me if you are interested in working with this type of doe.

We also retire a few does each year. While we would like to keep all our older does their entire lives, realistically we are able to maintain only a few of the most special ones. We like to rehome the others when they are still young enough to tolerate a move to a permanent home in a smaller herd. These are does that are approximately 7 years old and healthy enough to produce more kids, but getting older so they have a harder time competing in our larger herd. Or they simply deserve more personal attention than we are able to give them. These are some of our best does, or they wouldn't have been able to live here that long.

SEMEN-

We have semen available from most of our sires, both foundation animals and our more contemporary bucks. Our semen list can be viewed under '**Download Semen Sales List**'. I usually can deliver semen to the ADGA Convention and Nationals, as well as regional shows and events, or it can be picked up here. We will ship semen if you provide the shipper. We do have a \$100.00 minimum on semen purchases, although that can be combined with other buyers transferring semen at the same time. Please refer to the section on Semen for information on prices and availability.

*** We are upgrading our semen tanks. We have an older, reliable, large volume tank (150-180 canes, 1500-1800 straws) with a working time of 60-90 days. We've recently purchased a new tank with a longer holding time, and have this tank available. For anyone interested in purchasing a large volume of semen (20 canes or more), we would offer this tank to the buyer at no charge. It could be used to transport semen from multiple farms.*
