

PRICES, TERMS AND HEALTH CONDITIONS-

We do not knowingly sell animals with health or reproductive problems (with the exception of brood does where the problem is discussed first). We follow CAE prevention with annual testing and pasteurization, and are abscess free. The prices listed include an interstate health certificate, but do not include shipping or kennel, etc. Prices are negotiable, and may change depending on the quality of the dam when she freshens, but preordered kids with a deposit will not increase within a given year. A \$100 deposit will hold any kid, and is refundable if an acceptable kid is not born. We do reserve breeder's right to first choice of all kids. Kids must be picked up/delivered by 4 weeks of age unless other prior arrangements are made. We do charge \$20 per week boarding fee for goats held after 4 weeks. This includes being raised on pasteurized milk and vaccines/parasite control as per our treatment schedule. Please note that this may significantly increase after Jan 1, 2012, and depending on our milk supply, kids over 5 weeks old may have to go on milk replacer. Adult animals must be picked up at the farm unless delivery arrangements are made prior to purchase. Please refer to the previous page of this section for current breedings and prices.

Our kids are raised on pasteurized milk and alfalfa hay. Grain and pasture are introduced at weaning, usually about 10 weeks old. Coccidia is treated by regular, monthly treatments of Albon, and kids are vaccinated with CDT at monthly intervals until 4 months of age. We do experience problems with too rapid growth, especially in the Saanens, so we do not free feed. In our experience, early freshening is detrimental to does bred for ultra high production, so we wait a few extra months to breed yearlings. We will not be responsible for any doe which freshens prior to 16 months old. Just because they can grow fast and freshen young does not mean they should!!!

We strive to breed sound, healthy, productive goats. We work from a simple management plan that allows does to produce well without pushing them. We have our favorites, but nobody gets special treatment or feed. (okay, nobody under twelve years old!) We feed a moderate amount of good quality alfalfa, and the does have free access to pasture. Milkers are given 3 lbs daily of 16% goat dairy ration, does giving over 18 lbs get 4 lbs daily. Dairy cattle minerals and trace mineral salt blocks round out our feeding program. No extra vitamins, kelp, sunflower seeds, or foo foo dust are given to increase production or components. We do employ working dogs, both Border Collies for herding, and Anatolian Shepherds and an Akbash to guard against two and four legged predators. We live in the wet side of the Pacific Northwest, so parasites are a problem. Animals are treated before they leave, and we recommend treating again after they are purchased. We do our best to disclose any known health issues prior to an animal being sold. We value our reputation more than any of our awards, and try to be as honest as possible.

SEMEN-

We have semen available from most of our sires, both foundation animals and our more contemporary bucks. Our semen list is usually available on request. Some of our bucks are available through Frozen Assets (Karen Lewis). Karen can be contacted at www.FrozenAssetsAAR.com or email at froznasets@aol.com. We do have a \$100.00 minimum on semen purchases. I usually can deliver semen to the convention, sometimes Nationals, or it can be picked up here. We will ship semen if you provide the shipper.

Similar to last year, we plan to freshen several does in June and August. If you are interested in a well-bred but late born kid at a reduced price, please let me know. Our tentative breeding plans are listed below. Also, once again we will have some high quality crossbreds in the group, as all of our remaining Lamanchas, and some young Alpines will be bred Saanen.

As we incorporate a commercial dairy into our management, we will need to put more emphasis on milk quality. Thus, there may be some genetically valuable animals for sale with varying degrees of udder health issues. Please contact me if you are interested in working with this type of doe.

Saanen yearlings-

These yearlings are being bred to Vineyard View Tiber, due in June

Elenkara & Elenkira- sire-Elros x dam-Elendara

WinRiver- sire-Eosef x dam-Winseeker

Indio- sire-Master x dam-Nashville

Elixer- sire-Clinton x dam-Elende

Funny Bone- sire-Kentucky x dam-Silly Ears

These yearlings will be bred to Element to freshen in August

Denarii- sire-Cronus x dam-Riah

Catch a Star- sire-Jude x dam-Catcher

Alpine yearlings-

These yearlings will be bred to Jack or Rimrock, due in August

Free Hand - sire-Yukon Jack x dam-Imagined

Care Free- sire Topfen x dam Finally

Bellelay- sire- Freeport x dam-Xocati

Plainly Free- sire-Freeport x dam-Living

Tocaji and Tocai - sire-Tahoma x dam-Tokay

Sennet- sire-Jaeger x dam-Sienna

Remi- sire-Jaeger x dam-Pistol

LaMancha yearlings-

This yearling was bred to Arctic Fox (Saanen), due in May

Alissa- sire-Aksel x dam-Evianna

This yearling will be bred Saanen to freshen in August

Twyla- sire-Aksel x dam-Susan

Prices on the kids will vary depending on the quality of the dam when she freshens, and will range from \$200-\$500. Kids born in August will likely be priced lower than the June kids. Group purchases of more than 6 kids, which are picked up before the June 30th for the June kids, or August 25th for the August kids will have a 30% discount. As with the kids born in the spring, all purchases must be picked up before the kids are 4 weeks old unless prior arrangements are made.
