### **MILKERS FOR SALE**

Saanen- WinRider \$500  
Alpine- Quotation \$550  
LaMancha- Dorothy \$650  
Susan \$700

## **PRICES, TERMS AND HEALTH CONDITIONS-**

We do not knowingly sell animals with health or reproductive problems. We follow CAE prevention with annual testing and pasteurization, and are abscess free. The prices listed include an interstate health certificate, but do not include shipping or kennel, etc. Prices are negotiable, and may change depending on the quality of the dam when she freshens, but preordered kids with a deposit will not increase. A \$100 deposit will hold a kid, and is refundable if an acceptable kid is not born. We do reserve breeder's right to first choice of all kids. Kids must be picked up/delivered by 4 weeks of age unless other prior arrangements are made. We do charge \$12 per week boarding fee for kids held after 4 weeks. This includes being raised on pasteurized milk and vaccines/parasite control as per our treatment schedule. Adult animals must be picked up at the farm unless delivery arrangements are made prior to purchase. Please refer to the last page of this section for current breedings and prices.

*Note- Off Season Deposits-* I am accepting reservations now for next year. However, I do not yet know breedings or prices, and likely won't until things are finalized in late Sept/early Oct. What I do is to accept the deposit now. This puts you at the front of the line. If you do not like the prices or breedings, you have until the ADGA Convention to withdraw or move your deposit. At that point, it becomes a regular deposit, and is refundable only if an acceptable kid is not born.

We live in the wet side of the Pacific Northwest, so parasites are a problem. Animals are treated before they leave, and we recommend treating again after they are purchased. We do our best to disclose any known health issues prior to an animal being sold. We value our reputation more than any of our awards, and try to be as honest as possible.

Our kids are raised on pasteurized milk and alfalfa hay. Grain and pasture are introduced at weaning, usually about 12 weeks old. Coccidia is treated by regular, monthly treatments of Albon, and kids are vaccinated with CDT at monthly intervals until 4 months of age. We do experience problems with too

rapid growth, especially in the Saanens, so we do not free feed. In our experience, early freshening is detrimental to does bred for ultra high production, so we wait a few extra months to breed yearlings. We will not be responsible for any doe which freshens prior to 16 months old. Just because they can grow fast and freshen young does not mean they should!!!

We strive to breed sound, healthy, productive goats. We work from a simple management plan that allows does to produce well without pushing them. We have our favorites, but nobody gets special treatment or feed. (okay, nobody under twelve years old!) We feed a moderate amount of good quality alfalfa, and the does have free access to pasture. Milkers are given 3 lbs daily of 16% goat dairy ration, does giving over 18 lbs get 4 lbs daily. Dairy cattle minerals and trace mineral salt blocks round out our feeding program. No extra vitamins, kelp, sunflower seeds, or foo foo dust are given to increase production or components. We do employ working dogs, both Border Collies for herding, and Anatolian Shepherds and an Akbash to guard against two and four legged predators.

## **SEMEN-**

We have semen available from most of our sires, both foundation animals and our more contemporary bucks. Our semen list is usually available on request. Most of our bucks are available through Frozen Assets (Karen Lewis). Karen can be contacted at [www.FrozenAssetsAAR.com](http://www.FrozenAssetsAAR.com) or email at [froznasets@aol.com](mailto:froznasets@aol.com). We do have a \$100.00 minimum on semen purchases. I can deliver semen to the 2010 convention, or it can be picked up here. We will ship semen if you provide the shipper. I will admit to not liking to hassle with semen, so please be patient, or try Karen first.

## **2009-2010 BREEDING & PRICE LIST**

NOTE- prices and breedings are subject to change, preordered kids with a deposit will not increase for this breeding season

\* = first kid reserved, NFS = not for sale, PT= private treaty, ??? = we'll see how she freshens!
